
Introducing the new RailConnect™ TMSweb RMSweb

The industry's most comprehensive suite of transportation and revenue management solutions – now with a new modern and intuitive user experience.

RAILCONNECT

TMS^{web} and RMS^{web}

Visualization + ease of use

The new web-based versions of the RailConnect TMS and RMS applications modernize the green screens, increase situational awareness, and speed response with an intuitive user experience.

With features like context-driven navigation, customized dashboards, and high-performance visualization of yards and trains, TMS^{web} and RMS^{web} enables a contemporary approach to railroading while supporting all the proven features of RailConnect our customers have grown to love.

What's new in TMSweb and RMSweb

01

NEW Easy to Use + Intuitive Screen Design

Find information and execute tasks with minimal clicks. The screen design is newly improved and standardized across TMSweb and RMSweb for maximum efficiency.

02

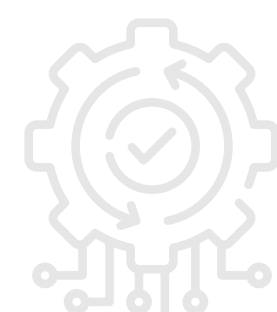

NEW Performance

Navigating and visualizing data is faster thanks to performance enhancements, new data architecture, and navigational improvements.

Maximizing productivity, improving visibility, and increasing operational efficiency across your railroad just got easier.

RailConnect™

As a core operations and communications system for railroads, RailConnect Transportation Management automates and tracks car movements and switching operations, provides visibility to rail assets, and empowers workers to better plan work-flow, generate work orders, measure performance, and improve customer service and financial performance.

Transportation Management System | **TMS**

A fully integrated and scalable enterprise-level rail operating platform built to improve railroad performance, efficiency, and profitability for operations of all sizes.

TMSweb

Web-based version of TMS
A web-based version of TMS that modernizes the user experience with a simple and intuitive interface.

RMS | Revenue Management System

A comprehensive railroad accounting system that fully automates the rating process and optimizes revenue management performance.

RMSweb

Web-based version of RMS
A web-based version of RMS that modernizes the user experience with a simple and intuitive interface.

CAweb

Web-based version of Cash App
A web-based version of Cash App that modernizes the user experience with a simple and intuitive interface.

PRODUCT SUITE

AA/BI

Advanced Analytics and Business Intelligence

REVENUE

A powerful business intelligence reporting and visualization tool, leveraging deep domain expertise, delivering actionable intelligence for empowered operational and financial decision-making.

mCrew

Mobile Train Crew

EXECUTION

A mobile reporting tool, integrated with RailConnect TMS, that enables train crews to execute their work in a digital application.

RVP

RailConnect Visibility and Planning

VISIBILITY

A tool for shippers to manage inbound railcar pipeline against forecasted production needs.

eBOL

Electronic Bill of Lading

EXECUTION

A tool to digitally create bills of lading in industry standard formats – fast and easy.

Car Hire

Payables and Receivables

REVENUE

An accounting tool to efficiently manage the processing of car hire expense and earnings for railroads & car owners.

RailConnect by the numbers

RAILCONNECT

Transportation Management System

TMS^{web}

RailConnect TMSweb is the backbone operational system for railroads of all sizes, for automating, scheduling and managing day-to-day operations.

TMSweb automates and tracks car movements and switching operations, provides visibility to rail assets, and empowers workers to better plan work-flow, generate work orders, measure performance, and improve customer service.

KEY CAPABILITIES

- **Visual Yard** – Drag/Drop. Single Click to create trains, work lists and interchanges. User and Railroad color coding. Dynamic Filtering.
- **Visual Trains** – GPS Tracking. Map based, Drag/Drop. Drill in/out. Complete Train/Car Schedules.
- **Dashboards** – Railroad, Region, Yard and Track Summaries. Inherited Color coding. Customizable Display and Export formats.
- **Automation Rules Engine** – Powerful set of Automation Rules Tables to automatically classify, block and update/supplement cars based on triggering events and conditions.

FEATURES

- **Car and Train Scheduling:** Build railcar and train schedules; measure actual performance against plan.
- **Visibility:** Tools to interactively manage inbound and on hand railcars.
- **Yard and Inventory Control:** Railcars and railroad assets.
- **Waybill Control:** Manage all aspects of railcar billing.

RAILCONNECT

TMSweb

Screen Shown: Active Waybills

KEY CAPABILITIES

- 01 Navigate to home screen in 2 clicks
- 02 Always know which app you are in
- 03 Easy navigation with menu bar
- 04 Context sensitive search
- 05 Easy application selection between TMSweb, RMSweb, and CAweb
- 06 Stationary action buttons. Always know where to click
- 07 Support for fast path codes
- 08 New clickable options panel

The screenshot shows the 'Waybill View/Select' page in a browser. The interface includes a top navigation bar with a menu icon (01), the Wabtec logo, and navigation links: Dashboard, Visual Yard, Visual Trains, My Reports, and My Links (02). A search bar (04) is located on the right. Below the navigation bar is a 'FAST PATH' section with 'FIND CAR' buttons (07). The main content area features a 'Waybill View/Select' title, a 'Selected: 1' indicator, and a 'CLEAR X' button. A search form (03) includes fields for FIND CAR, SENDER ID, BLOCK, STATUS, Bill of Lading, MULTI L/T, DATE, SWITCH, and RWC. Below the form is a table of waybills with columns: CAR, LE, COMMODITY, SHIPPER, BOL #, DATE, ORIGIN, M, and HLD. A left-hand options panel (08) lists actions such as Send EDI, Waybill, Seed from Bill of Lading, Multicar Weight, History, View Multicar, RWC History, EDI, EDI Validation Log, Move Instructions, Print, Show Holds, and Blocking History. Action buttons like '<< BACK' and 'SUBMIT' (06) are visible at the bottom right of the main content area.

RAILCONNECT

Revenue Management System

RMS*web*

RailConnect RMS*web* is a comprehensive railroad accounting system that fully automates the rating process and optimizes revenue management performance.

Integrating seamlessly with the industry standard Interline Settlement System[®], RMS*web* features a powerful rating engine and rate database that manages the settlement of freight revenue between railroads.

KEY CAPABILITIES

- **Powerful Rating Engine:** Automate the rating process for all aspects of railcar billing. Streamline the settlement of freight revenue between railroads. Quickly access current and historical rates.
- **Revenue Protection:** Ensures all traced waybills have associated revenue related to car movement.
- **Electronic Exchange of Waybills:** Automates electronic transmission of invoices to customers.

FEATURES

- **Productivity and efficiency:** Automates billing and invoicing. Drives bottom-line productivity by reducing manual efforts, paperwork, and data entry.
- **Revenue recognition:** Optimizes revenue management. Streamlines monthly accounting practices. Ensures that all waybills have associated revenue related to car movement.
- **Integration:** Directly connects with industry standard EDI transaction sets. Provides seamless integration with AAR Data Exchanges. Interfaces to multiple industry solutions.

RAILCONNECT

Cash App CAweb

RailConnect CAweb is a powerful accounts receivable tool designed for managing accounts receivable aging, transactions, and collections.

CAweb consolidates all invoice types and groups them by customer. Users are able to comprehensively calculate all outstanding invoices/balances for any customer. Users can also track invoice date to cash payment received. Cash App allows users to complete the revenue processes and measure performance.

KEY CAPABILITIES

- Open accounts receivable
- A/R transactions (current/history)
- A/R reconcile report
- Aged open accounts receivable
- Activity register
- Master files
- Print menu
- Utility menu
- Rapid payment posting

Benefits

TMS + ROI: Train Management Simplified. Rail Operations Improved.

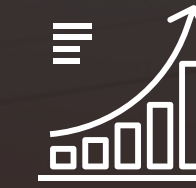

Productivity & Efficiency

Automates all aspects of train and switching operations. Automates billing and invoicing.

Increases Visibility

Provides visibility to railcars anywhere on the railroad by type, status, and location.

Improves Railroad Performance

Helps to increase volume and velocity; reduce dwell.

Revenue Recognition

Optimizes revenue management. Streamlines monthly accounting practices and provides complete revenue protection.

Empowers the Workforce

Eliminates clerical work. Automates repeatable tasks. Accelerates decision-making.
