Welcome to Wabtec

Overview

Wabtec is a diversified, global leader in equipment, components, services, software and systems for the transportation industry. Drawing on nearly four centuries of collective experience across Wabtec, GE Transportation and Faiveley Transport, the company is paving the way in safety, efficiency, reliability and productivity.

As an integrated solutions provider, Wabtec accelerates lifecycle solutions for the transportation industry by improving interoperability, efficiency and competitiveness for customers. With more than 23,000 locomotives in our global installed base, and components on many of the locomotives, freight cars and transit cars around the world, we are the movers and shakers of tomorrow’s logistics and transit solutions.

Our digital solutions, combined with Positive Train Control (PTC) and electronics capabilities, unlock significant productivity improvements — saving billions of dollars for rail customers and operators, all while creating pathways to advanced automated operations. These digital technology solutions improve safety and efficiency for the transportation industry, helping address the growing demand for improved rail performance.

Industry Heritage
Nearly four centuries of experience with roots dating back to Thomas Edison and George Westinghouse.

Freight Segment
Wabtec’s Freight segment is a leader in freight solutions for the rail industry. This includes a comprehensive line of locomotives, including the most efficient diesel-electric fleet in the world, digital solutions and a broad selection of mission-critical controls, including Positive Train Control (PTC), cabin, and advanced braking systems. We have over 23,000 locomotives in our global installed base.

Our freight solutions meet the total lifecycle needs of the entire fleet: from new locomotives, to modernizations, service and repairs.

Transit Segment
Wabtec’s Transit segment provides products to virtually every major rail transit system, supplying an integrated series of components for commuter and metro cars, as well as buses, that deliver safety, efficiency and passenger comfort.

We offer an extensive array of products, from pneumatic, electronic and hydraulic brake equipment, to HVAC and sanitation systems. Each product draws upon Wabtec’s deep experience in tailoring components to meet the specific needs of customers, manufactured using the latest technologies.

Other Segments
Along with our portfolio of products and solutions for the rail and transit industries, Wabtec is also a leader in mining equipment, marine, stationary power, drill, and industrial solutions.

For the automotive industry, Wabtec offers turbochargers and motorcycle brake pads and shoes. Additionally, Wabtec custom manufactures rubber products and cast parts according to customer specifications.
